aymen-bahri

SKILLS

Python	C/C++	MATLAB
Keras	Tensorflow	Matplotlib
Scipy	QT	Numpy
Pandas	OpenCV	SQL
MySQL	Scilab/Octave	Django
Dash Plotly	Git	Bash
FPGA	SOLIDWORKS	ANSYS
OpenCOR	Vivado Xilinx	Deal.II

CERTIFICATIONS

Building Transformer-Based Natural Language Processing Applications (January 19, 2023)
Nvidia

Sequence Models (August 01, 2020)
DeepLearning.AI

Convolutional Neural Networks (May 01, 2020)
DeepLearning.AI

Python for Data Science, AI & Development (March 01, 2020)
Coursera

LANGUAGES

Arabic	French	English
Native	Mid-range	Mid-range

EDUCATION

National Engineering School of Tunis, University of Tunis El Manar(ENIT)|University of Paris - UFR Mathematics & Computer Science (September 09, 2022 - Present)
Master's degree , Informaton Processing and Complexities of Living Organisms (ENIT) in Co-graduation with the Master in Computer Vision and Intelligent Machines(Paris Cite)
M2

National School of Engineers of Monastir, University of Monastir (August 31, 2018 - July 31, 2021)
Bachelors's degree, Electrical Engineering

El Manar Preparatory Engineering Institute,University of Tunis El Manar (September 01, 2015 - June 20, 2018)
Preparatory Engineering Studies, Technical Sciences

WORK EXPERIENCE

EMWorks (December 22, 2021 - August 31, 2022)
Application and Support Engineer

• Designed and simulated electrical systems using software tool based on the finite element method for electromagnetism
• Tested and validated company's software , reported bugs and proposed enhancements to the software team.
• Prepared Webinars and application notes
• Prepared a tutorial course on finite elements for the National Engineering School of Monastir

EMWorks (March 14, 2021 - July 30, 2021)
Application Engineering Intern

• Compared 3D vs 2D finite element simulation Results for planar and Axisymmetric Problems
• Simulated the Toyota Prius 2004 and Tesla'3 Interior permanent magnet motors
• Prepared a white paper

DoctorSina (July 31, 2020 - September 25, 2020)
Undergraduate Intern

• Build a sequential DNN and CNN models for binary classification of X-Ray chest images (Pneumonia detection)
• Build a CNN for multi-class classification of X-Ray images(Mass, Cancer ,Pneumonia,fluid...)
• Used a pretrained VGG19 Model and compared results to the base model

ACADEMIC PROJECTS

Sentiment Analysis
Build a CNN and Sequential models for images and text Classification

Build a CNN model for sentiment analysis. Build a Multi-input model for multi-class classification from both images and vectorized text as input. Used a pretrained(VGG 16) model and compared results.

https://github.com/LaymenB/DL_EXAM_TICV_2023

Python | Keras | Tensorflow | CNN

Medical Brain Images Correction and Segmentation
MRI and CT Scan Brain Images Segmentation,geometry Correction and Registration

Segmentation, geometry Correction, Registration and clustering on medical images in various formats, Used K-means for JPEG Brain images Segmentation, Visualization of 3D volumes with different contrasts of MRI images .

Python | Pydicom | Nifti | SimpleITK | Matplotlib | OpenCV | Dash Plotly
